

# Welcome to Our World

**Staverton**

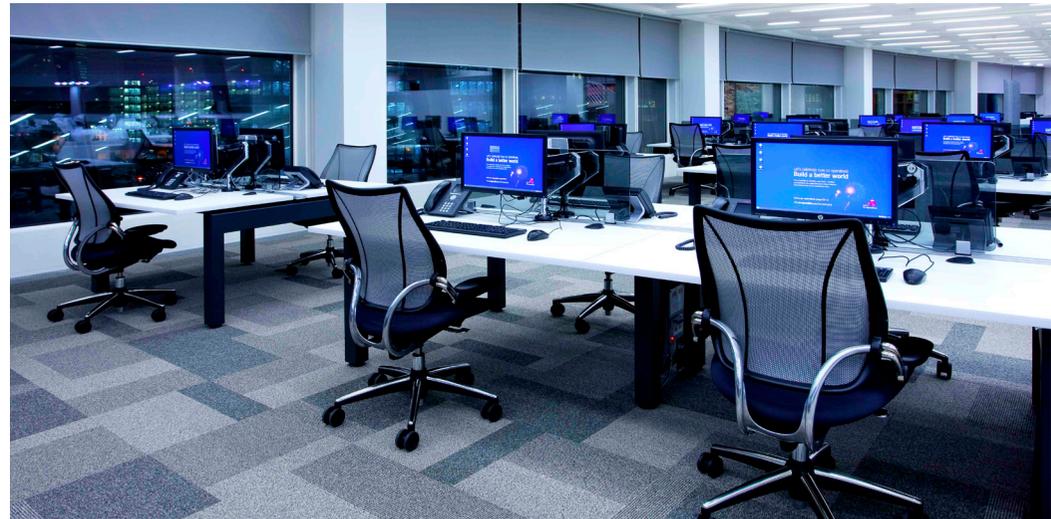

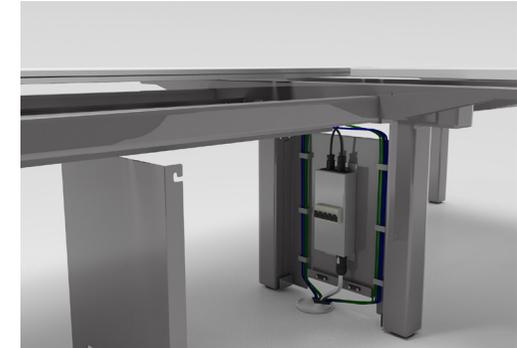

# We Are Staverton

We are Staverton and we solve furniture challenges, we've made our name designing and manufacturing office furniture to suit clients' specific needs.

We come into our own when you set us a challenge, whether it's building on an existing product or starting with a blank piece of paper. We bring form, function and flexibility together without compromise.

British and proud, we have a manufacturing facility in South Yorkshire and a showroom in Clerkenwell, London.

With the latest BAZ processing machinery recently installed, the factory has more than 38,000 sq. ft. of space for manufacture and assembly and ample room for our design team to turn client requirements into fully developed designs.

# Our Solutions

---

Although best known for our workstations, Staverton has a much wider range of furniture solutions spanning workplace and integrated technology.

## Sit Stand

A fully adjustable range of mobile desk and bench solutions.

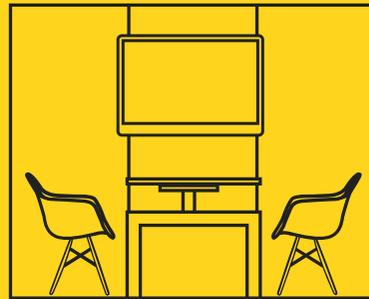

## 88 Family

Hybrid steel/timber collection includes desk, bench and table solutions.

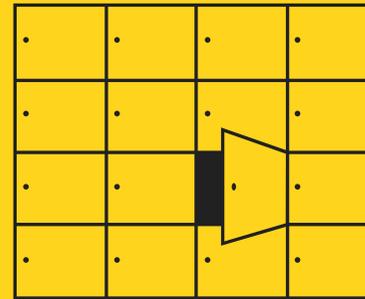

## Benching

Flexible and space efficient, bench desking brings people together.

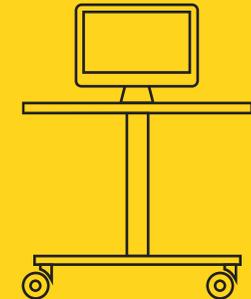

## VC Meetings

A modular wall system that can host TV monitors, whiteboards, shelves, and more.

## Storage

While offering standard storage solutions, including pedestals.

## Mobility

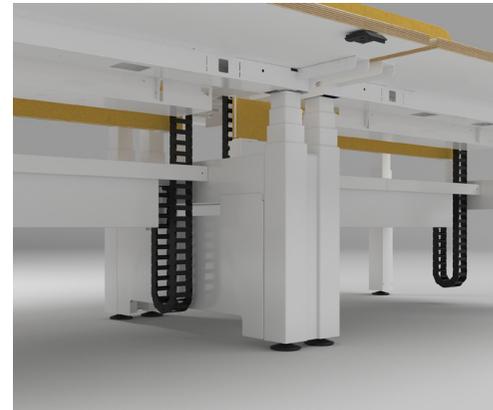

Agile working demands change to teams, locations and styles of work.

# SOS

Productive, healthy and efficient workspaces encourage employees to move more. Staverton SOS allows you to find the height that suits you best.

It's also compatible with software which can remember your settings and will remind you when to move.

## Details Matter

- Hot-swappable actuators allow for easy configuration changes between fixed and height-adjustable plus easy maintenance and assembly.
- Hi-capacity variants for both upper and lower cable management for increased cable requirements.
- Intermediate leg offering to reduce cost on long linked runs.
- Two tiers of linking allow for higher versatility and client choice.
- Leg frame cladding allows for invisible and protected cable entry while enabling easy management and cable access.
- Fully cable managed system for linked workstations; cables running between workstations are secure and removed from sight.
- Protected umbilical/unobstructed legroom allows for a variety of pedestals to be used to maximise legroom and comfort.

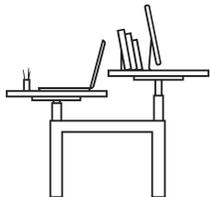

# SL

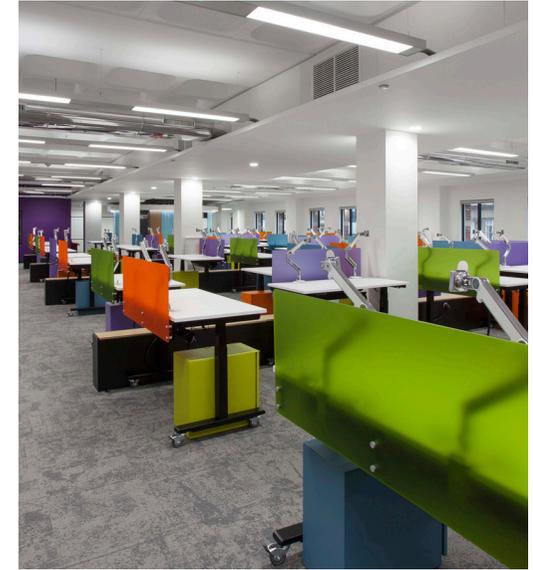

The SL range is highly versatile and can adapt to any type of office environment. All workstations can be used individually or they can be connected in order to form long benches which are ideal for team work.

---

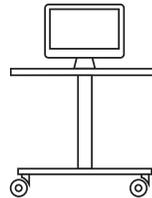

SL is an innovative, feature-packed range of sit-stand workstations. Its light-weight framework allows for both cost-effective manufacture and solid construction.

**Staverton**

# SMS

Lockable, load-bearing castors with 360-degree rotation allow users to roll the desk to the location that suits.

Agile working demands change to teams, locations and styles of work. Move your desks as you see fit with ease and without compromise. This mobile solution means desk configuration can change as teams change. And, thanks to its 'plug and play' simplicity, the team can move the desks for themselves.

As your team and layout needs change, Staverton SMS will just roll with it. A simple click of the lock and the desk is secure and wobble-free leaving you to sit or stand.

Our newest range is a great alternative to the overabundant market offer of 'all steel' framework solutions. Its platform uses the underlying flexibility of a telescopic metal beam in conjunction with solid timber uprights to create a versatile steel/timber hybrid under-structure.

# 88

The Staverton 88 range —introduced as part of our 88th anniversary celebrations—includes attractive desk, bench and table solutions.

It features tapered solid oak legs and provides users with optional novel solid oak 'plank' toolbars. Its beautiful and stylish design is combined with a versatile modular structure, which allows a most efficient use of space.

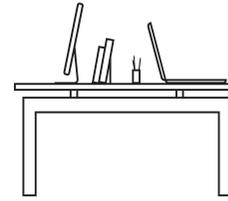

In keeping with all Staverton ranges, 88 also includes discreet and practical cable management and power systems as well as a wide variety of screen options.

This sophisticated furniture system will make any office environment feel like home.

# CL

CL is our clever bench. Clean lines provide a solid platform for fully integrated power and data solutions to be accommodated within the bench's structure.

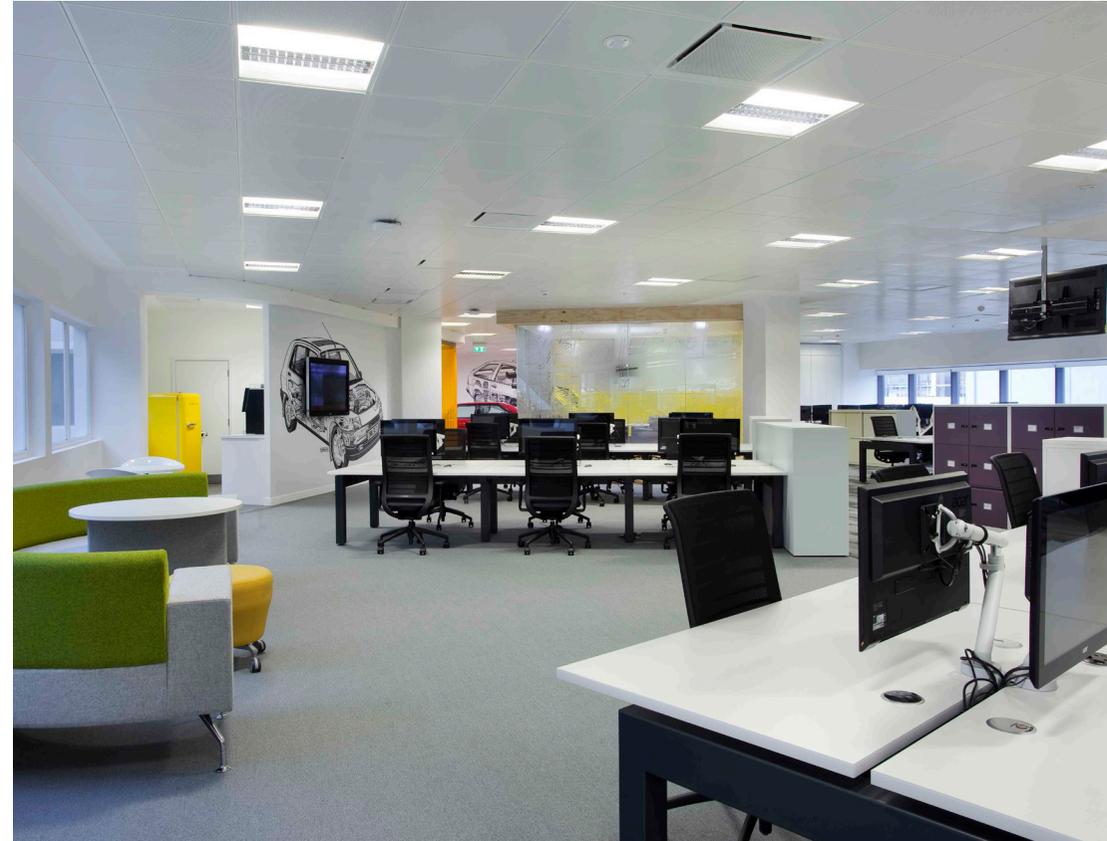

CL removes the need for specialist electrical installation as all power issues are dealt with above the floor.

Sliding tops, vertical risers, and hinged containment trays allow service teams to maintain a safe yet accessible power distribution system.

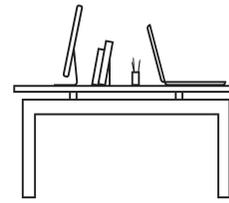

A leg-mounted PDU delivers power for up to ten desks and a simple 'plug in' design, promotes easy installation and greater flexibility.

CL is individually height settable, achieved through the use of stackable spacers. Concealed cabling creates a flawless finish.

# ZD

ZD can be simply customised to provide an exact foot-print or shape, due to the use of a telescopic structural beam and the floating worksurface.

The Staverton ZD range holds the prestigious FIRA Gold Certification.

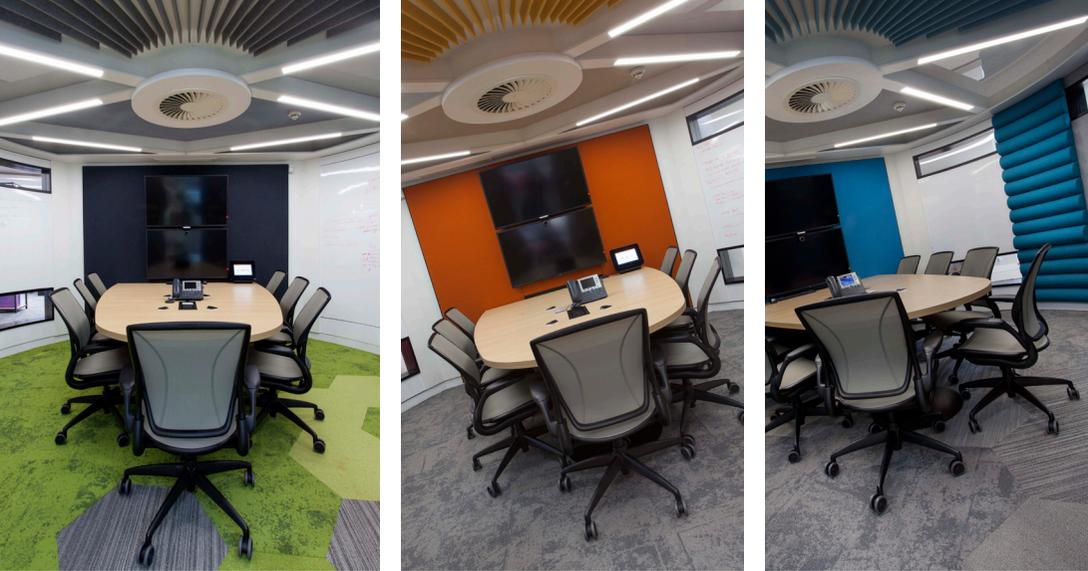

ZD combines the minimal aesthetic with exceptional build quality at a highly competitive price. A full collection of desks, benches and tables are offered with a light floating top that sits away from the structural frame.

Cable management is simple and effective, concealing all vertical and horizontal cable paths from view.

# Workwall

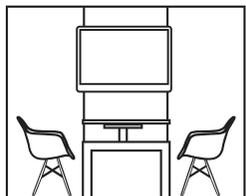

Workwall is a modular wall system that hosts TV screens, whiteboards, acoustic panels and more.

Aluminium framed, wall-hung panels are available in a multitude of configurations and customised to different sizes, finishes and accessories.

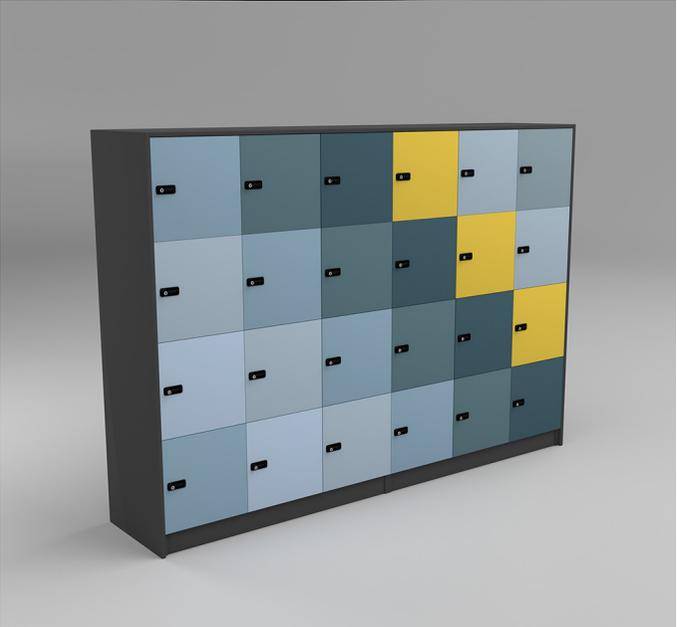

Completely customisable, Workwall gives you the flexibility to design the perfect system for your environment.

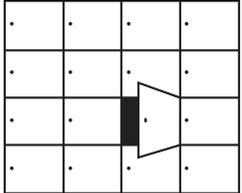

# BX

Designed for the agile workplace, BX is our new range of smart locker solutions. Customise your colour and tailor your size to the needs of your office and team, easily.

## Inspire Creativity

Increase organisation and productivity, creating a fun, vibrant work environment. Our wide selection of finishes lets you customise your door fronts, carcass and add décor cladding panels. Your storage can be as unique as your company.

# You Can Always Count On Us

## Staverton Introduction

Staverton has a longstanding history in office furniture design. We are recognised for bringing form, function and flexibility together without compromise. Our bespoke approach, innovative design and fine craftsmanship have earned us a name as a responsible and reliable award-winning British manufacturer.

## Lead Time

Having our own production facility in South Yorkshire and the latest BAZ processing machinery installed in the factory allows Staverton to have a most competitive lead time. The benefits of our 38,000 sq ft of space for assembly and design become evident by the short time between the placement of an order and the delivery of the product.

## Warranty

All of our systems have a lifetime warranty on the framework and a 10 year warranty on top panels. Moving parts and electrical items have a 5 year warranty. The warranty is valid for products supplied in mainland UK, used during normal office hours and covers all defects in materials and workmanship, but does not apply to damage resulting from neglect, misuse or accidents.

## Resources

At Staverton we understand the importance of supporting our dealers, they are our partners in the industry and we want their business to grow. A comprehensive set of space planning tools and resources such as detailed product specifications, image library, render graphics, CAD and BIM files is available for them.

## Repair & Maintenance

Regular repair and maintenance is essential to keep screens and upholstered furniture looking at its best. We can provide extensive furniture cleaning care tips, conservation advice, repair instructions and recommendations that will preserve Staverton's products looking great for a long time.

## Showroom

Conveniently located in London, our newly refurbished Clerkenwell showroom exhibits Staverton's wide range of products. All of our dealers and their clients are welcome to visit us, discover our complete catalogue and have a close-up look at our offering.

## Quality Policy

Our commercial and management objectives are to provide products and services that consistently meet the needs and expectations of our clients, whilst operating in compliance with all regulatory requirements. To ensure this goal we have British Standard BS EN ISO 9001:2015 Quality System Model accreditation.

## Environmental

We believe that helping to protect the environment shouldn't be a static process but an ongoing one. To this end we are currently developing partnerships with several environmental consultancies in order to enable us to help our clients manage the disposal of their end-of-life office furniture in a responsible manner.

Staverton was one of the first UK office furniture companies to achieve the ISO 14001 certification. We are proud to hold the BM TRADA's registration number –001 as well as the current ISO 14001:2015 certificate.

*'Staverton designed a mobile sit-stand desk that really supports us in our bid to embrace agile working. We now have the flexibility for our teams to move themselves, without needing to involve facilities or IT.'*

Mark Mercer  
Global Facilities Director  
King

# Case Study

Staverton also devised and installed 50 acoustic Workwall panels, each of which support meeting room AV systems and are linked directly to a variety of bespoke shaped meeting tables.

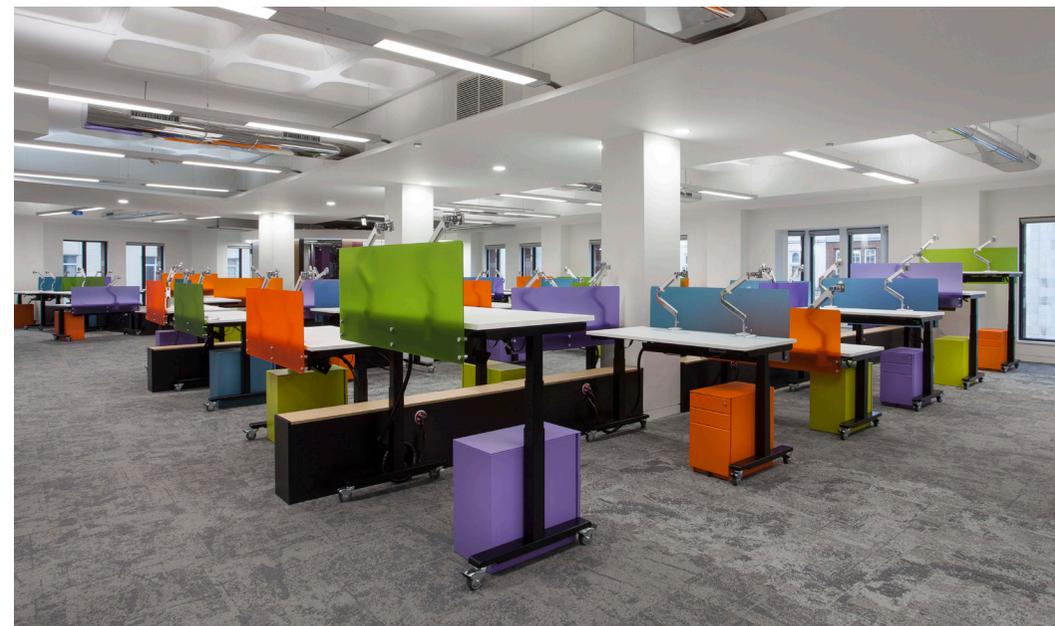

## King

Scale: 1,500 workstations  
Location: London | Stockholm | Barcelona  
Timeline: 18 months  
Furniture: Staverton SMS, SOS & Workwall

Interactive entertainment company King wanted a Mobile Sit Stand solution to promote agile working in its offices.

Sit Stand Mobile can be moved as the team requirements change and thanks to its 'plug and play' simplicity the team can move the desks for themselves.

*'We wanted a bench solution that would support our team's dynamic and collaborative working style and at the same time make ongoing IT and maintenance much easier by bringing all power above the floor. Staverton stood out because the design team really listened to what we were trying to achieve.'*

Alison Ross  
Technology Director  
Auto Trader

# Case Study

## Auto Trader

Scale: 600 workstations  
Location: manchester  
Timeline: 8 weeks  
Furniture: Staverton CL

---

Auto Trader's move to a new Manchester head office and brought together five offices under one roof creating a clear need for furniture that would support collaborative working and the wide variety of technologies in use.

Staverton listened closely to Auto Trader's specific needs and chose to modify an existing product, Staverton CL, to fit the brief.

Concealed power and data resources within CL's core structure keep power above the floor and make it easier to identify and solve maintenance problems.
